Subject: Art styles and image prompting
Activity duration: 90 min

Steps:

1. Art Styles (45 minutes)
    - Motivation + Assignment 1: spot the difference (15 min)
    - Assignment 2: mystery image (30 min)
2. Prompting images (45 minutes)
    - Assignment 3: reverse engineer your mystery image (10 min)
    - Assignment 4: swap and guess (10 min)
    - Assignment 5: create a logo (25 min)

Learning goals:

- Art styles have common visual features.
- Distinguish art styles in paintings and photographs.
- Using AI to learn responsibly: describe images, request verification links from museums, and cross-check facts
- How to prompt to obtain the image you want
- Create a logo

Setup:

- Students need access to an AI LLM chat bot, and an AI image generation tool.
- The teacher provides and prints mystery artworks for every pair or students.
- The teacher prints a Style Feature Guide and Style Card for every pair of students.

# From style to prompt

*Creating images with an art historian's eye*

## In this teacher guide you find

- Supplementary material on Assignment 1: Spot the difference
- List of possible mystery artworks

You can choose to focus only on paintings, or also mix in photographs in this lesson. In case you work with photographs as mystery art works in Assignment 2, a follow-up assignment could be that the students try to make a photograph themselves in the same style.

### Assignment 1: Spot the difference

As a warm-up, show two paintings that students compare and describe. You can choose your own pair; here is a suggested pair on the same theme (waves/sea) that differs clearly in technique, mood, and spatial depiction. You can do the same with two photographs, suggestions are also given below.

### Painting A — Katsushika Hokusai, "The Great Wave off Kanagawa" (c. 1831)

Style: Ukiyo-e (Japanese woodblock print)
Museum link: The Met `https://www.metmuseum.org/art/collection/search/45434`
**Student-friendly style features**

- Clear outlines: sharp, bold lines around shapes.
- Flat color areas: big patches of color; little shading.
- Asymmetry: off-center composition; strong diagonal sweep of the wave.
- Detail in patterns: foam looks like claws; boats are crisp.
- Space feels "flat": Mount Fuji small and near the surface.

### Painting B — J. M. W. Turner, "Snow Storm — Steam-Boat off a Harbour's Mouth" (1842)

Style: Romanticism
Museum link: Tate `https://www.tate.org.uk/art/artworks/turner-snow-storm-steam-boat-off`
**Student-friendly style features**

- Loose brushwork: soft, swirling strokes; blurred edges.

- Atmospheric color: misty blends of gray, brown, sea tones.
- Dramatic light: stormy contrasts; light peeking through.
- Motion and mood: spinning feel; intense, emotional.
- Deep space: fading forms and haze suggest depth.

**Key style differences (what students can spot)**

- Line vs. brush: Hokusai uses clear outlines; Turner dissolves edges.
- Flat vs. deep space: Hokusai looks graphic/flat; Turner suggests deep space.
- Color handling: Hokusai uses clean, separated colors; Turner blends into atmosphere.
- Detail vs. atmosphere: Hokusai emphasizes crisp detail; Turner emphasizes mood and movement.
- Mood: Hokusai is patterned/controlled; Turner is chaotic/emotional.

**Quick discussion prompts**

- Where do your eyes go first in each image? Why?
- How does each artist make the wave feel powerful (line vs. brush, flat vs. deep space)?
- Which feels more like a "poster" or print, and which feels like a "painting of weather"? Explain with evidence.

## Idea for photographs to compare

**Photo A — Henri Cartier-Bresson, "Behind the Gare Saint-Lazare" (1932)**
Why it's great for contrast: A candid, black-and-white street photograph that captures the "decisive moment" as a man leaps over a puddle. Unstaged, fast, and all about timing and composition.
Verification link: MoMA `https://www.moma.org/audio/playlist/244/3135`
**Style features**

- Real vs. staged: candid/documentary; subject didn't pose.
- Motion: slight blur in foot/water; action frozen mid-jump.
- Composition/framing: strong shapes/reflections; leading lines; off-center focus.
- Light/shadow: natural, soft daylight; balanced tones.
- Mood/message: everyday life at a perfect instant; playful/observational.
- Technique: 35mm film, quick shutter; classic darkroom process.

**Photo B — Steve McCurry, "Afghan Girl" (1984)** Why it's great for contrast: A vivid color portrait for a magazine cover—staged in the sense that the subject faces the camera directly. Slow, controlled, all about gaze and color.
Verification links: National Geographic `https://www.nationalgeographic.com/photography/article/afghan-girl-steve-mccurry`
Steve McCurry Studio `https://stevemccurry.com/galleries/afghan-girl`
**Style features**

- Real vs. staged: documentary portrait; composed with care.
- Color/palette: bright, intense color; green background vs. red headscarf; striking green eyes.
- Composition/framing: tight close-up; centered focus; shallow depth of field.
- Light/shadow: soft light enhancing texture and eye color.
- Mood/message: direct, intense gaze; emotional impact; social/documentary message.
- Technique: 35mm color film; controlled exposure and focus.

**Quick discussion prompts**

- What makes A feel "caught in the moment," while B feels "confrontational and intentional"?
- How do black-and-white vs. color change the mood and what you notice first?
- In A, where does your eye travel? In B, what locks your gaze?

## Assignment 2: Mystery art work

20 possible "mystery" artworks for Assignment 2. Note: website links can change over time; searching the name and artist will help locate images when the links no longer work properly.
Mix these so that each pair of students has a different style. Most images are public domain in the EU.

## Tips for recreating these photography styles with a phone

- Street/doc: shoot candid moments; use burst mode; keep distance; look for strong shapes and reflections.
- Portrait/classic: place subject by a window; use a plain background; center or off-center per mood; convert to B&W.
- Modernist close-up: find a single object; use side light; get very close; simplify the frame.
- Night/urban: shoot near windows or lamps; let shadows be dark; look for wet floors or shiny surfaces.
- High-speed: capture water splashes with bright light; use "Live Photo" or burst; pick the sharpest frame.
- Color documentary: find everyday scenes with bold colors; avoid heavy filters; let color lead the eye.
